omaha, IL 62871-2810

October 3, 2003

Federal Communications Commissioner Jonathan Adelstein  
FCC  
445 12th Street SW  
Washington, DC 20554

Dear Federal Communications Commissioner Adelstein:

CC Docket Nos 96-45, 98-171, 90-571, 92-237, 99-200, 95-116, 98-170 and  
NSD File No. L-00-72.

I am opposed to the proposed changes to the Universal Service Fund. I urge the FCC to carefully consider the impact of these changes on consumers before changing the current system. Charging \$1 or more per month regardless of how much or how little we use our phone is not fair. This will greatly increase the cost of phone service and it could impact the ability for myself and others to afford landline and/or wireless service.

The USF was created to make phone service affordable in rural America and was updated to increase the availability of communication services to schools, libraries, rural health centers, educational institutions and low-income individuals in the United States. Now you want to change it and I do not think it is fair to charge everybody \$1 dollar per month regardless of how much or how little they use their wireless phone for interstate calls.

The proposed change is especially unfair for low-volume users that rely on wireless service for safety and security, and who make few, if any, long distance calls. A contribution system is fair, equitable and nondiscriminatory and should be left alone. Please do not penalize wireless phone customers. Keep this fair. We don't have a blanket income tax on our annual salaries nor do we have the same sales tax on a pack of gum and an automobile, so why should there be a "one size fits all" charge for wireless phones?

Sincerely,

dion gross

Federal Communications Commission  
Washington, 20554

Dear Federal Communications Commissioner Abernathy:

CC Docket Nos 96-45, 98-171, 90-571, 92-237, 99-200, 95-116, 98-170 and  
NSD File No. L-00-72.

I am opposed to the proposed changes to the Universal Service Fund. I urge you to carefully consider the impact this would have on consumers before changing the current system. Charging \$1 or more per month regardless of how much or how little we use our phone is not fair. The proposal to move the USF to a number-based flat fee will greatly increase the cost of phone service and it could impact consumers' ability to afford landline and/or wireless service.

The USF was created to make phone service affordable in rural America and was updated to increase the availability of communication services to schools, libraries, rural health centers, educational institutions and low-income individuals in the United States. Now you are considering changing it to what I think is an unfair plan, charging everybody \$1 dollar or more per month regardless of how much or how little they use their wireless or landline phone for interstate calls.

The proposed change is especially unfair for low-volume users that rely on wireless service for safety and security, and who make few, if any, long distance calls. A contribution system is fair, equitable and nondiscriminatory and should be left alone. Please do not penalize wireless phone customers. Keep this fair. Americans don't pay a blanket income tax on our annual salaries nor do we have the same sales tax on a pack of gum and an automobile, so why should there be a "one size fits all" charge for wireless phones?

Thank you.

Sincerely,

Corey W. L. Gordon

Federal Communications Commission  
Office of the Secretary

October 31, 2003

Federal Communications Commissioner Kathleen Abernathy  
Federal Communications Commission  
Washington, 20554

Dear Federal Communications Commissioner Abernathy:

CC Docket Nos 96-45, 98-171, 90-571, 92-237, 99-200, 95-116, 98-170 and  
NSD File No. L-00-72.

I am opposed to the proposed changes to the Universal Service Fund. I urge the FCC to carefully consider the impact of these changes on consumers before changing the current system. Charging \$1 or more per month regardless of how much or how little we use our phone is not fair. This will greatly increase the cost of phone service and it could impact the ability for myself and others to afford landline and/or wireless service.

The proposed change is especially unfair for low-volume users that rely on wireless service for safety and security, and who make few, if any, long distance calls. A contribution system is fair, equitable and nondiscriminatory and should be left alone. Please do not penalize wireless phone customers.

Sincerely,

Ben Brown

Federal Communications Commissioner Kathleen Abernathy  
Federal Communications Commission  
Washington, 20554

Dear Federal Communications Commissioner Abernathy:

CC Docket Nos 96-45, 98-171, 90-571, 92-237, 99-200, 95-116, 98-170 and  
NSD File No. L-00-72.

I am opposed to the proposed changes to the Universal Service Fund. I urge the FCC to carefully consider the impact of these changes on consumers before changing the current system. Charging \$1 or more per month regardless of how much or how little we use our phone is not fair. This will greatly increase the cost of phone service and it could impact the ability for myself and others to afford landline and/or wireless service.

The USF was created to make phone service affordable in rural America and was updated to increase the availability of communication services to schools, libraries, rural health centers, educational institutions and low-income individuals in the United States. Now you want to change it and I do not think it is fair to charge everybody \$1 dollar per month regardless of how much or how little they use their wireless phone for interstate calls.

The proposed change is especially unfair for low-volume users that rely on wireless service for safety and security, and who make few, if any, long distance calls. A contribution system is fair, equitable and nondiscriminatory and should be left alone. Please do not penalize wireless phone customers. Keep this fair. We don't have a blanket income tax on our annual salaries nor do we have the same sales tax on a pack of gum and an automobile, so why should there be a "one size fits all" charge for wireless phones?

Sincerely,

Athan Manuel

Reference: FCC Docket Nos 96-45, 98-171, 90-571, 92-237, 99-200, 95-116, 98-170 and NSD  
File No. L-00-72.

Dear FCC:

I am writing to complain about the proposed changes to the Universal Service Fund and requesting that the FCC investigate this matter further before changing the current policy. Your proposed \$1.00 per month charge for all wireless phones will directly impact my ability to retain my wireless service.

I do not think it is fair to charge EVERYBODY \$1.00 dollar regardless of how they use their wireless phone, especially for a low-volume user that relies on wireless service for safety and security, not interstate calls. The current policy is fair, based on interstate usage, and should be left alone. Please do not penalize us. Keep this fair.

Thank you for your prompt attention to this matter. Please provide a written response indicating the status/resolution of this matter.

Very truly yours,

Susan Adams  
6302 Parkway Avenue

CC: FCC Subcommittee Members
